

Casuarina glauca 'Kattang Karpet'

Casuarina glauca Kattang Karpet

Description

A prostrate fine-leaf form of the common she-oak. *Casuarina glauca* 'Kattang Karpet', with a slow to moderate growth rate, forms a lovely thick mat of fine foliage which follows the contours of the landscape, acting as a living mulch and suppressing weeds. Also a good choice for cascading over walls and rocks. Tolerates a wide range of soil types, from light clay to sand, but grows best in a well-drained slightly acid soil in full sun. Avoid wetting foliage if possible to minimise fungal problems. Ensure adequate soil moisture during establishment. Tolerates light frosts, coastal and inland situations.

Specifications

Dimensions	Height: 0.1 to 0.5m, Width: 2m
Aspect:	Full sun
Origin	Mid North Coast NSW
Pests & diseases	Fungal problems and caterpillars
Typical sizes	140mm, 200mm
